TEAM2 SHARE about our project

The "Team2Share: Integrated Training & Teaching for Learning further aiming Knowledge Sharing Across Generations" project, hosted by the National Scientific Research Institute for Labour and Social Protection (INCSMPS, Romania), in partnership with eight other European organisations from four European Union countries (Austria, Belgium, Greece, Romania) plus Turkey .

The project was developed in the context in which almost three-quarters of the EU population has at least a qualification in upper secondary education, but basic literacy and numeracy skills are not a matter of course. In 2017, about 61 million adults aged 25 to 64 had ceased formal education before completing upper secondary education.

Project Objectives

1. Strengthening key skills, including life skills, through introducing innovative methods useful for teachers and trainers;
2. Supporting the development and uptake of innovative approaches in learning methodologies and digital technologies for teaching and learning;
3. Improving the access to training for low skilled adults, with focus on vulnerable groups by increasing quality, supply and accessibility of learning opportunities tailored to their learning needs;
4. Providing opportunities for professional development of teachers/trainers through the development of effective digital, open and innovative methods supporting the work with low skilled adults.

First kick -off meeting online

The Share2Team online kick-off meeting took place on the 25th of November 2020. This is a KA2 Erasmus+ project which gathers 8 partners from different European countries (Romania, Greece, Austria, Belgium, and Turkey).

Liliana Greci (INCSMPS) from the project coordinator opened the meeting and introduced the partners and main objectives of the project together with Klaus and Susana from Blickpunkt Identität.eu).

Partner countries face the same problems: high share of low skilled adults, poor participation of adults to education and training, low opportunities for adult learning.

The project AIMS to support the acquiring of key competences, including basic skills for all through the development and transfer of innovative learning methods for low-skilled adults, including but not limited to vulnerable groups.

It was a successful first meeting with very positive inputs and outcomes and we agreed to meet each other again in January 2021.

Expected results - Intellectual Outputs

1. Training programme for trainers/teachers/ mentors working with low skilled adults, consisting of a training curriculum and content that will be inserted in an ICT state of the art tool "Android application – App1" which will be based on an innovative methodology "team-oriented learning in interactive working groups" that was developed based on the principle "reproduction of the learning material in its own words deepens the acquired knowledge";
2. Training programme for low skilled adults aiming their Team2Share, consisting of a training curriculum and content developed and included in a second app, namely "Android application – Team2Share App2";
3. Guidelines for Formative Monitoring and Assessment of learning outcomes, consisting in a collection of methods for formative performance monitoring, including numerous methods of performance assessment in various formats, aiming to increase performance motivation through targeted and helpful feedback.
